Ok thanks.. I have not figured out how to be on the Sussman call and with Scott at the same time.. I'll probably get the guys started with Gene and Seth and log in a little late if that's OK

We are talking generalities with Hines and company about Marcellus communications.

Feel free to get into all the data detail you want about EPA's concerns about a health threat - and to get their reaction to a request to provide alternate water again.

Ex. 5 - Deliberative

Jon. A little concerned the paper says the meeting on 14 with DEP will discuss their decision to take further action.. What do you want me to discuss with Scott. Or do you plan that discussion with John H at the 9:00?

Shawn - attached for your review is the Briefing Paper prepared for Bob Sussman meeting on Wednesday at 9:30 am. It is structured around the specific questions that Bob posed at the prep session on Monday and reflects the input of several R3 organizations. Many thanks to Angela who served as the main editor.

The "Next Steps" are left purposely general to allow for discussion of a recommended action plan on the options.

We have not yet sent this to Ann Campbell for HQs distribution. Will await your review and OK to do that. Thanks.
